IMPORTANT NOTIFICATION

International application No.
PCT/ZA2004/000071

International filing date (day/month/year)
25.06.2004

Priority date (day/month/year)
15.07.2003

Applicant
DETNET SOUTH AFRICA (PTY) LIMITED et al.

1. The applicant is hereby notified that this International Preliminary Examining Authority transmits herewith the international preliminary report on patentability and its annexes, if any, established on the international application.
2. A copy of the report and its annexes, if any, is being transmitted to the International Bureau for communication to all the elected Offices.
3. Where required by any of the elected Offices, the International Bureau will prepare an English translation of the report (but not of any annexes) and will transmit such translation to those Offices.
4. **REMINDER**

The applicant must enter the national phase before each elected Office by performing certain acts (filing translations and paying national fees) within 30 months from the priority date (or later in some Offices) (Article 39(1)) (see also the reminder sent by the International Bureau with Form PCT/IB/301).

Where a translation of the international application must be furnished to an elected Office, that translation must contain a translation of any annexes to the international preliminary report on patentability. It is the applicant's responsibility to prepare and furnish such translation directly to each elected Office concerned.

For further details on the applicable time limits and requirements of the elected Offices, see Volume II of the PCT Applicant's Guide.

The applicant's attention is drawn to Article 33(5), which provides that the criteria of novelty, inventive step and industrial applicability described in Article 33(2) to (4) merely serve the purposes of international preliminary examination and that "any Contracting State may apply additional or different criteria for the purposes of deciding whether, in that State, the claimed inventions is patentable or not" (see also Article 27(5)). Such additional criteria may relate, for example, to exemptions from patentability, requirements for enabling disclosure, clarity and support for the claims.

Re Item V

The closest prior art is disclosed in US4860653. This document shows the features of the preamble of the claim.

The subject matter of the present invention differs from this known method in its characterizing features and is therefore novel (Art. 33 (2) PCT).

The problem solved by the present invention is to increase the arm time and preserve the safety of the procedure.

The subject matter of the present invention is also inventive (Art. 33 (3) PCT) because the solution proposed is not known, and therefore not obvious in view of the available prior art.

The invention is industrially applicable (Art. 33(4) PCT).
